Study On Starting Salary Of Workers To Be Ready In October - Richard Riot

Datuk Seri Richard Riot

KUALA LUMPUR - The Human Resources Ministry is conducting a study to determine the starting salary for each employment sector, particularly those involving university graduates. Its minister, Datuk Seri Richard Riot said the effort was done to improve the salary schemes in this country to keep pace with the current economic situation.

"The study includes job placement from the city to rural areas according to their respective districts. Hopefully, it can be completed in six months," he said in reply to a supplementary question from Hee Loy Sian (PKR-Petaling Jaya Selatan) on measures to improve the starting salary of university graduates in Dewan Rakyat today. Prime Minister Datuk Seri Najib Tun Razak had stated that all government-linked companies (GLCs) must join the 1Malaysia Training Scheme (SL1M) to help reduce unemployment.

"Action including reduction of allocation, will be taken against GLCs which did not join or take in apprentices for training under SL1M,," he said when replying to a supplementary question from Datuk Noraini Ahmad (BN-Parit Sulong) on the measures that can be taken by

companies in addressing it. Riot said the government, with the cooperation of various ministries and agencies had offered many programmes to raise the employability level of university graduates and youths. They include SL1M by the Economic Planning Unit with the cooperation of JobsMalaysia, Graduates Enhancement Programme for Employability (Generate) by Pembangunan Sumber Manusia Berhad and 'Golongan Pekerja dan Future Workers' programme organised by the Skills Development Fund Corporation.

"A report by the Statistics Department said the number of unemployed youths in 2015 was at 273,600 compared to 2014 in with 248,000 or a 1.2 percent rise. "The high unemployment rate among graduates is a phenomenon faced by every developing and developed country. This group is in the transition process from school life to the job market and need to go through job hunting." He said to assist and facilitate youths to find jobs, the ministry implemented initiatives such as creating a portal for employment, establish employment centres at Urban Transformation Centres (UTC) and establish career information centres.

Govt Studying National Starting Salaries For All Sectors Of Employment

KUALA LUMPUR: The government is in the midst of studying the national starting salaries for all sectors of employment in Malaysia. Human Resources Minister Datuk Seri Richard Riot said the study would be taking into consideration salaries based on different areas in the country.

"We are in the midst of it. Hopefully the study would be completed in another six months," he told the Dewan Rakyat during the Minister's Question Time. He was responding to a supplementary question posed by Hee Loy Sian (PKR - Petaling Jaya Selatan) who asked why there was only a minimal increase in the starting salaries of fresh graduates since the 1990s.

Hee in posing his question argued that the starting salaries of fresh graduates 20 years ago were around RM1,800 as compared to the current starting salaries of RM2,000. Riot also said that in 2015, a total of 273,600 youths below the age of 24 were unemployed, an increase of 1.2% from 248,000 unemployed youths the year before.

He however said that the high unemployment rate among graduates in Malaysia is normal as the same situation occurred in other developing and developed nations globally. "They (graduates) are in the transition process from their study years into the work market, and they need to go through the process of finding jobs," he said.

Riot said the government through cooperation with several ministries and agencies had implemented various programmes to increase the employability of Malaysians.

Kajian kadar gaji pelajar universiti hampir siap

Richard Riot.

KUALA LUMPUR - Kementerian Sumber Manusia sedang mengkaji penetapan gaji permulaan bagi setiap sektor pekerjaan, khususnya yang melibatkan golongan lepasan universiti, kata menterianya, Datuk Seri Richard Riot Jaem. Beliau berkata, usaha itu dilakukan bagi memperbaiki skim gaji di negara ini agar seiring mengikut keadaan ekonomi semasa. "Kajian itu akan dilakukan mengikut penempatan pekerjaan di bandar sehingga ke luar bandar mengikut daerah masing-masing. Mudah-mudahan ia akan dapat disiapkan dan diperkukuhkan dalam masa enam bulan lagi," katanya.

Beliau berkata demikian ketika menjawab soalan tambahan Hee Loy Sian (PKR-Petaling Jaya Selatan) mengenai langkah bagi memperbaiki skim gaji permulaan gaji lepasan universiti pada persidangan Dewan Rakyat hari ini. Dalam hal sama, beliau berkata Perdana Menteri Datuk Seri Najib Tun Razak sebelum ini menyatakan bahawa semua syarikat berkaitan kerajaan (GLC) mesti mengambil bahagian dalam program Skim Latihan 1Malaysia (SL1M) bagi membantu mengurangkan kadar pengangguran. "Mana-mana GLC yang tidak mengambil bahagian atau tidak mengambil perantis untuk menjalani latihan di bawah program SL1M ini akan diambil tindakan antaranya adalah mengurangkan peruntukan," katanya menjawab soalan tambahan Datuk Dr Noraini Ahmad (BN - Parit Sulong) mengenai langkah yang boleh diambil oleh syarikat dalam menangani hal tersebut.

Riot berkata kerajaan menerusi kerjasama pelbagai kementerian dan agensi merangka dan menawarkan pelbagai program bagi meningkatkan kebolehpekerjaan rakyat termasuk lepasan universiti dan golongan belia yang menganggur. Jelasnya, antara program yang dilaksanakan adalah SL1M oleh Unit Perancang Ekonomi dengan kerjasama JobsMalaysia, 'Graduates Enhancement Programme for Employability (Generate)' oleh Pembangunan Sumber Manusia Berhad serta program Golongan Pekerja dan 'Future Workers' anjuran Perbadanan Tabung Pembangunan Kemahiran.

"Berdasarkan laporan penyiasatan tenaga buruh oleh Jabatan Perangkaan, bilangan belia yang menganggur pada 2015 adalah 273,600 orang berbanding 2014 iaitu seramai 248,000 orang. Ada peningkatan 1.2 peratus. "Kadar pengangguran yang tinggi dalam kalangan graduan adalah fenomena yang dihadapi oleh setiap negara membangun dan maju di dunia. "Golongan ini berada dalam proses transisi daripada alam pembelajaran kepada pasaran pekerjaan dan perlu mengalami proses untuk mencari pekerjaan," jelasnya. Riot berkata, bagi membantu dan memudahkan semua belia mendapat pekerjaan, kementerian turut melaksanakan inisiatif seperti mewujudkan portal perkhidmatan pekerjaan, penubuhan pusat kerja di Pusat Transformasi Bandar (UTC) dan penubuhan pusat maklumat kerjaya.

Bakery Worker's Hand Pierced By Metal Rod While She Was Mixing Flour

PUCHONG - A bakery worker had to endure the pain of having her hand stuck inside an industrial dough mixer for over an hour until help arrived at a bread factory in Puchong Industrial Park. In the incident which happened at 12:15pm yesterday, the victim, a woman in her 20s was reportedly mixing the flour into the machine when her hand was caught by the moving machinery parts.

According to a Selangor Fire and Rescue Department spokesperson, the department received the emergency call at 12:35pm and immediately dispatched a team to the location. The Bomba spokesperson said rescue personnel had to cut through the metal rod in the mixer in order to extract the worker's hand safely.

"The victim was still conscious and we immediately sent her by ambulance to Serdang Hospital for treatment," the spokesperson said, Harian Metro reports.

The gory incident which was shared on Kelab Info Malaysia Facebook page triggered expressions of concern among viewers with many asking why the worker was allowed to put her hand into a moving industrial machine.

Others expressed concern about hygiene and worker safety, after photographs of the worker who is clad only in shorts and t-shirt went viral.
